POWER

MITE SPRAY FOR POULTRY

WORKS INSTANTLY & EFFECTIVELY

The geraniol-based mite spray effectively helps to repel mites in poultry houses and coops. It works quickly, is easy to use, and ensures a clean, mite-free environment – for healthier animals and better laying performance.

EASY TO USE – IN 4 STEPS

1 PREPARE

Thoroughly clean the coop, removing loose bedding, feathers, and manure. Ensure the area is as dry as possible before application.

2 SPRAY

Spray the mite spray evenly from about 20–30 cm (8–12 inches) onto all affected areas. Pay special attention to cracks, corners, and perches.

3 LET IT WORK

Allow the spray to dry completely for optimal results. Do not cover or use the coop for at least 4–6 hours. Keep animals out during this time.

4 ENJOY THE PROTECTION

The spray forms a protective barrier and helps to keep mites away long-term. Use regularly for reliable and lasting protection.

APPLICATION AREAS OF THE SPRAY

PERCHES & ROOSTING BARS
Mites often hide on perches and roosting bars, where birds rest.

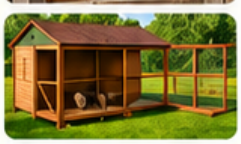
NESTING BOXES & COOPS
Spray nesting boxes regularly to prevent mite infestations and keep eggs clean.

CRACKS, GAPS & CORNERS
Mites hide in small cracks and corners – treat these areas thoroughly.

FLOORS & BEDDING
Spray directly on floors and bedding to combat mites at early stages.

DOORS, WINDOWS & FRAMES
Mites can also hide on frames and structures – don't forget to treat these.

OUTDOOR & SHELTER AREAS
Also treat outdoor runs, shaded shelters, and rest areas regularly.



TIPS & RECOMMENDATIONS FOR BEST PROTECTION

REGULAR USE
For prevention, use 1–2 times per week.
In case of a severe infestation, spray for 3 consecutive days, then repeat 1–2 times per week.

THOROUGH CLEANING
Clean coops, nests, and perches regularly to remove dirt, feathers, and droppings. Cleanliness is the basis for effective protection.

GOOD VENTILATION
Ensure fresh air circulation. Good ventilation reduces humidity and makes it harder for mites to survive.

A DRY ENVIRONMENT
Mites thrive in damp and warm conditions.
Keep the coop dry and promptly remove wet areas.

COMBINE FOR OPTIMAL PROTECTION
Combine the spray with regular cleaning and bedding replacement for the best results.

CHECK REGULARLY FOR INFESTATION
Inspect nests, perches, and corners regularly for signs of mites. Early detection helps prevent a major outbreak.

IMPORTANT: Avoid contact with eyes, skin, and mucous membranes.
Do not spray directly on people, animals, or open wounds.

MITE SPRAY FOR POULTRY

WORKS INSTANTLY & EFFECTIVELY

FREQUENTLY ASKED QUESTIONS (FAQ)

HOW DOES THE MITE SPRAY WORK?
The spray contains geraniol, which effectively repels mites and prevents their establishment. It works quickly, is easy to use, and ensures a mite-free environment.

DOES THE SPRAY KILL MITES?
No, the spray does not kill mites. It repels them effectively and prevents them from settling and multiplying.

WHICH TYPES OF POULTRY IS THE SPRAY SUITABLE FOR?
Suitable for chickens, quails, ducks, geese, turkeys, and other poultry.

CAN I SPRAY THE PRODUCT DIRECTLY ON MY ANIMALS?
No, do not spray the product directly on the animals. Use it only in the surroundings, in the coop, and on nesting areas.

HOW OFTEN SHOULD I USE THE SPRAY?
For prevention, use it 1–2 times per week. In case of a heavy infestration, spray for 3 consecutive days, then repeat 1–2 times per week.

HOW LONG DOES THE EFFECT LAST?
The effect lasts several days, depending on the environment, air circulation, and use. Regular application provides the best long-term protection.

CAN I ALSO USE THE SPRAY IN NESTING BOXES AND COOPS?
Yes, the spray is ideal for coops, nesting boxes, and all areas where poultry are kept.

CAN I USE THE SPRAY ON PERCHES AND BEDDING?
Yes, the spray is suitable for perches, bedding, walls, floors, and other surfaces in the coop.

IS THE SPRAY ALSO SUITABLE FOR YOUNG BIRDS?
Yes, the spray can also be used in coops with chicks and young birds. Ensure good ventilation.

IS THE SPRAY SAFE FOR MY ANIMALS?
When used as directed, the spray is safe for your poultry. Avoid contact with the eyes, skin, and mucous membranes.

DOES THE SPRAY HAVE A STRONG ODOR?
No, the spray has a pleasant, natural scent from geraniol, which usally fades after a short time.

DOES THE SPRAY ALSO HELP WITH HEAVY INFESTATIONS?
Yes, in the case of a heavy infestation, thoroughly clean the environment and use the spray for 3 consecutive days in combination with regular preventive use.

HOW CAN I PREVENT A MITE INFESTATION?
Clean regularly, replace bedding, keep the coop well ventilated, and use the spray regularly to keep mites away.

CAN I COMBINE THE SPRAY WITH OTHER PRODUCTS?
Yes, the spray can be combined with regular cleaning and bedding replacement to achieve optimal results.

IS THE SPRAY ALSO SUITABLE FOR MOBILE COOPS AND OUTDOOR RUNS?
Yes, the spray can also be used in mobile coops and outdoor runs. Ensure complete and even coverage of the affected areas.

DO YOU HAVE ANY OTHER QUESTIONS?
Our customer service will be happy to help you! Contact us using the details provided on the packaging.

IMPORTANT: AVOID CONTACT WITH EYES, SKIN, AND MUCUS MEMBRANES. DO NOT SPRAY DIRECTLY ON POULTRY OR OPEN WOUNDS.

PRODUCT MANUAL & INSTRUCTIONS FOR USE

PRODUCT NAME:

GREEN GUARDIA POWER MITE REPELLENT SPRAY FOR POULTRY, 500 ML

For targeted control of mites in poultry houses, coops, and other typical housing areas.

1. PRODUCT DESCRIPTION:

BRIEF DESCRIPTION:

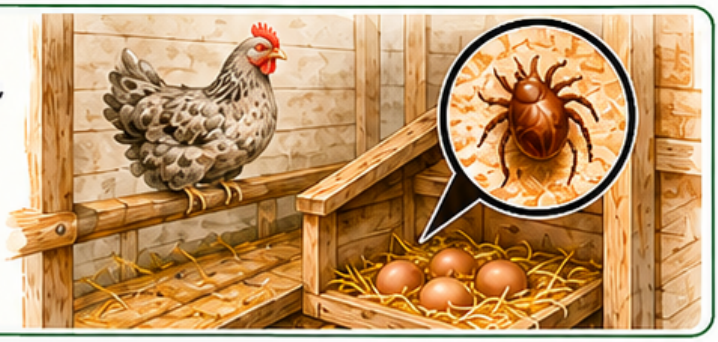
The GREEN GUARDIA mite repellent spray for poultry is a ready-to-use repellent spray for targeted use in poultry houses and other housing areas. The formula is based on plant extracts and essential oils, including geraniol, which effectively repels mites in typical infestation areas such as perches, nests, nesting boxes, roosting bars, cracks, and other contact surfaces.

2. WHAT IS THE MITE REPELLENT SPRAY FOR POULTRY?

The product is a ready-to-use repellent spray with natural plant extracts and essential oils. It was specially developed for use in areas where mites occur, in coops and poultry houses. It helps to create a hygienic environment and thus significantly reduce the pressure from mite infestation.

3. MITE INFESTATION IN POULTRY:

- Mites often hide on perches, in cracks, nesting boxes, and roosting bars.
- An infestation can lead to restlessness, feather loss, reduced well-being, and poorer performance.
- Mites are particularly active in warm housing areas and can multiply rapidly.
- Regular treatment of typical infestation areas supports the protection of your poultry.



4. COMPOSITION:

Water, alcohol, neem oil, citronella oil, geraniol, auxiliary substances (emulsifiers, preservatives)

USE BIOCIDES WITH CAUTION.
ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

SERVICE & SAFETY INSTRUCTIONS

SAFETY INSTRUCTIONS:

INSTRUCTIONS:

- **Shake well before use:** The spray contains natural oils; some components may settle. Use the product only after it has been thoroughly mixed.
- **Do not use in direct sunlight:** It is best to apply the spray in the early morning or late evening to avoid surface discoloration or damage to plants.
- **Test on a sensitive surface before use:** First try the product on a small, inconspicuous area and wait 24 hours.
- **Keep out of reach of children and pets:** Although it is plant-based, contact with eyes or mouth should be avoided.
- **Store in a cool, dry place, protected from light:** Ideal storage temperature: 10–20 °C (50–68 °F). Protect from frost and direct sunlight.
- **Do not release into aquatic environments:** The product must not be discharged into ponds, aquariums, or drainage systems.
- **Use of protective gloves is recommended:** Wear gloves when spraying and, if necessary, safety glasses, especially with frequent use or on large areas.
